Xklude Content

The Xklude.com database screens global listed companies against 32 fundamental controversial issues and reveals who invested in them. All selected controversial issues are identified from trustworthy global sources and are updated twice a year.

Furthermore the Xklude.com database tracks on controversies linked to companies by intelligent global ESG media coverage updated every 15 minutes. Additionally, Xklude.com shows a range of ESG data perspectives from trustworthy ESG data collectors.

As of April 2021 more than 2100 companies are identified to be linked to one or more of the 32 fundamental controversial issues.

What is a controversial issue?

Controversial issues cover a wide range of themes that can be defined as controversial for various reasons. All issues are therefore not necessarily expressions of specific legal violations but have more character of an ethical dimension, where it's ultimately up to individuals or investor managers to assess whether the issue is in line with decided values, norms or politics for responsible investment.

All current 32 fundamental controversial issues are categorized into 11 controversial topics; Business Model, Carbon Risk, Coal, Deforestation, Financing Fossil, Human Rights, Oil & Gas, Oil Sands, Tax avoidance, Tobacco and Weapons. Furthermore, the 32 controversial issues are listed into 5 ESG categories
